SOLUTION

Encryption

In the context of constant communications and exchanges, Stormshield Data Enterprise can provide completely transparent and automated encryption of local or shared directories.

Easy management of zones of confidence

- Integration with email customers for the ratification and confidentiality of email messages
- Security for data shared between internal and external employees

Guaranteed confidentiality

- Dissociation of confidential data access and consultation
- Technology certified by various bodies (Common Criteria, NATO)

Centralised administration

- Management of security policies
- Management of user identities
- Key management (PKI)
